Introduction

Station Medicare Centers (SMCs) are the primary Medicare facilities at Air Force Wings and Stations. SMCs are small hospitals. They mainly function as OPD polyclinics with comprehensive lab, and provide physiotherapy, radiology and dental services. Additionally, they have medical admin module meeting stores, dispensary, aviation medicine, medical stats, and medical boards. The inpatient facility is limited.

The requirement is to develop web based application software integrated with existing available and underdevelopment IAF Medicare modules. This software is similar to hospital information system software in terms of generic content but the scope, functionality, presentation and outcomes will be different.

The software is smart, interactive, user friendly with more prompts to assist doctors and paramedics in all respects of medical care. Medical stores module provides for modern inventory control and cost analysis. Medical exam and medical board provides for integration with existing database software (Oracle based) and document management software (Archi doc).

The software is a comprehensive tool not only for quick paperless day to day functioning of the SMC but also provides for data search, analysis of time and trends, across all relevant fields to give meaningful health data for further research, analysis and planning.

Medical Exam Module

The Medical Exam module takes care about different types of Medical Exams like-

- Annual Medical Exam AFMSF -3B.
- Medical Exam on Release/ Discharge AFMSF -18.
- Medical Exam (Primary/ Ext of Service) AFMSF -2A.

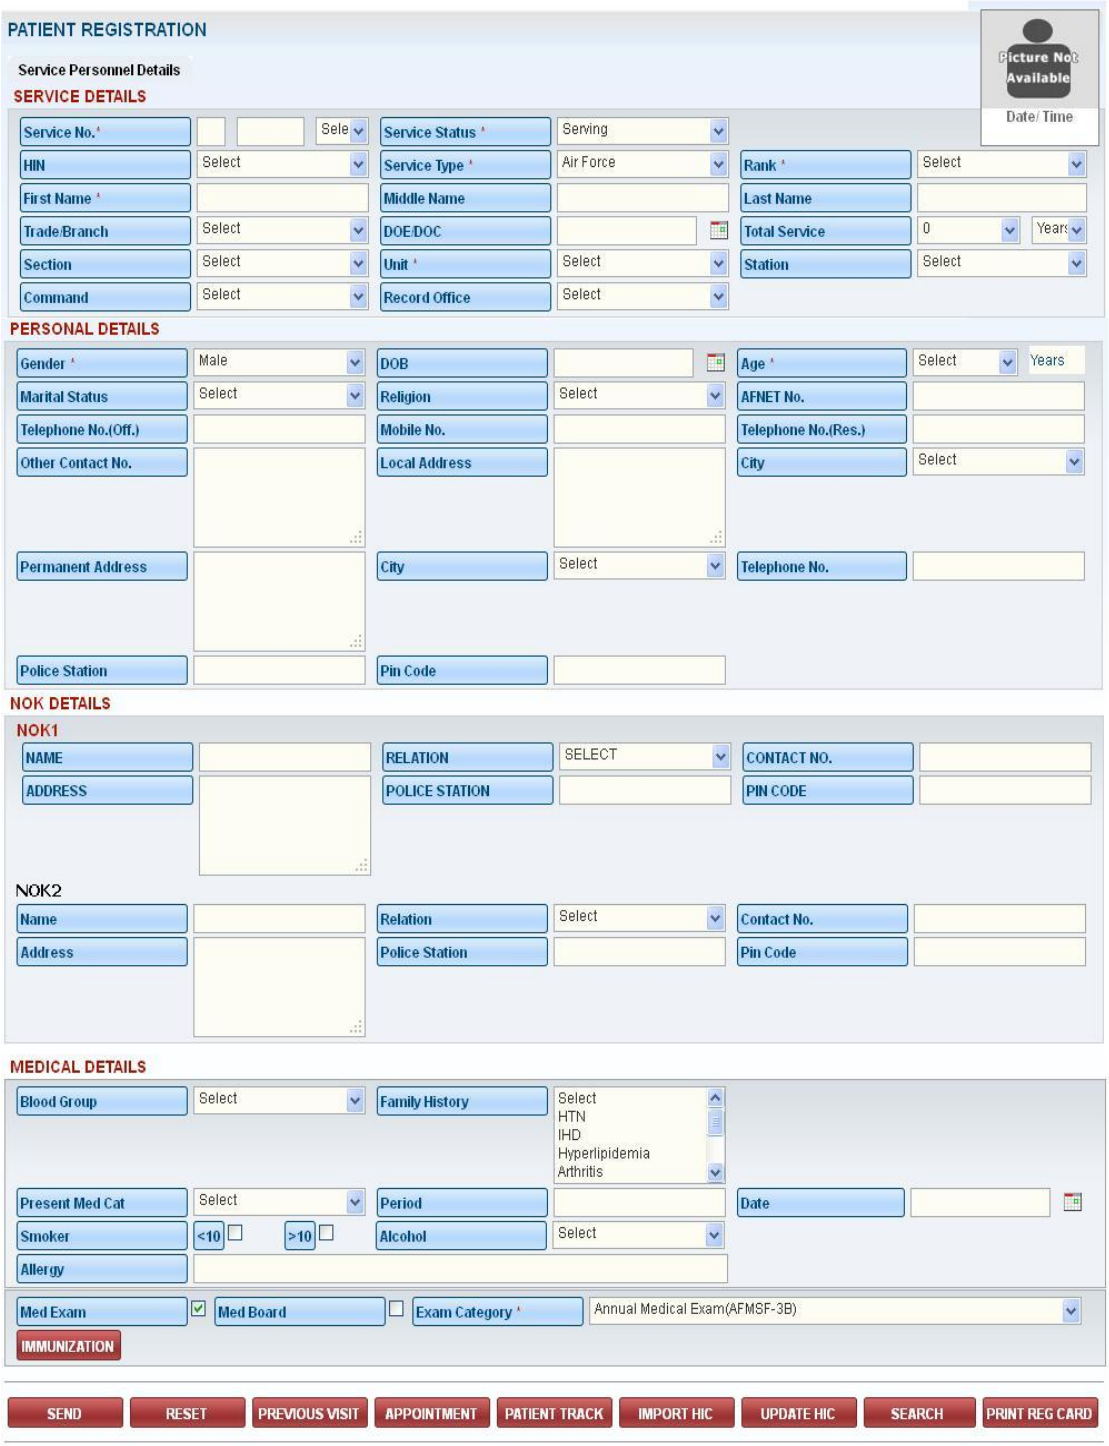
Registration

Service personnel report to the medical exam department for medical exam. Medical assistant registers the service personnel for respective medical exam.

Medical assistant enters the demographic information of the Service personnel and selects the medical exam type. If service personnel are already registered in IAF MEDNET then medical assistant enters only service no. of the service personnel. Other details populate automatically, after that medical assistant is required to select the respective medical exam type.

If service personnel present the HIC card then medical assistant authenticates the HIC card, and as soon as HIC card is authenticated, the service personnel details populate automatically from HIC card and after that medical assistant are required to select the respective medical exam type.

Data of Initial Medical Exam (AFMSF – 2A), Latest Annual Medical Exam (AFMSF – 3B) and latest Medical Board (AFMSF – 15) also gets transferred from HIC card to IAFMEDNET.



Service No.: It is an enterable field. Here, the service no. of the service personnel should be entered with respective prefix or suffix. It is a unique number assigned to the service personnel. It cannot have null values.

Service Status: The service status of the service personnel should be entered. It may be Serving, Ex. Serving, and Civilian etc. This is a list element (Selectable). The values come from Service status Master. It

cannot have null values.

It is a unique no for the entire patient care system. This no. gets assigned to the patient at the time of registration and it is the same for life time for that particular patient.

Service Type: The service type of the service personnel should be entered. It may be Air Force, Navy, Army, etc. This is a list element (Selectable). In case of Service type “Civilian” Service no., Service personnel name and other service related detail is disabled. The values come from Service Type Master. It cannot have null values.

Rank: The Rank of the service personnel. This is a list element (Selectable). The values come from Rank Master. It fetches the record based on the selected service type. It cannot have null values.

First Name: The First Name of the Service Personnel. It is an enterable field it cannot have null values it can contain alphabets a-z.

Middle Name: The Middle Name of the Service Personnel. It is an enterable field it can have null values it can contain alphabets a-z.

Last Name: The Last Name of the Service Personnel It is an enterable field it can have null values it can contain alphabets a-z.

Trade/Branch: This is the name of Trade/Branch of the service personnel. The values come from Trade/Branch master. It can have null value.

DOE/DOC: Date of enrollment/ commission of the service personnel. It is an enterable field. It can have a null value.

Total Service: Total serving time of the service personnel. It gets calculated as per DOE/DOC entered, user cannot change the value. If DOE/DOC not entered then user can select the total service in years/ months or days. It can have null value.

Section: This is the name of Section of the service personnel. It is a list element. The values come from Section Master. It can have null values.

Unit: This is the Unit of the service personnel. It be a list element. The values come from Unit master. It can have null values.

Station: This is the Station of the service personnel. The values come from Station Master. It can have null Values.

Command: This is the command name of the service personnel. The values come from Command Master. It can have null Values.

Record Office: This is a list element (Selectable). The value comes from Record office master. It can have null values.

Personal Details

Gender: This is a list element (Selectable). The value comes from gender master. It cannot have null values.

DOB (Date of Birth): This is an enterable field in the format of DD/MM/YYYY. It can have null values.

Age: This is an enterable field. The system calculates the approximate age if date of birth has been entered. If DOB is not available, then the approximate age of the patient is entered. It cannot have null values. It can have numbers from 18 to 120 years.

Marital Status: This is the Marital Status of the service personnel. The values are Unmarried, Married, Divorcee, Separated. It can have null value.

Marriage Date: This is an enterable field in the format of DD/MM/YYYY. It can have null values.

Religion: This is the Religion of the service personnel. This is a list element (Selectable). The value comes from Religion master. It can have null value.

AFNET No.: It is an enterable field. It can have null value.

Telephone No. (Off.): This is the Telephone no. (Office) of the service personnel. It is enterable field. It can have null values.

Mobile No: It is the mobile no. of the service personnel. It is enterable field. It can have null values.

Telephone No. (Res.): This is the Telephone no. (Residence) of the service personnel. It is enterable field. It can have null values.

Other Contact Nos: User can enter multiple contact nos. It is enterable field. It can have null values.

Local Address: Local address of the service personnel. It is an enterable field. It can have null value.

City: Local city of the service personnel. It is a list field. Value comes from city master. It can have null value.

State: State of the service personnel. It is a list field. Value comes from state master. It can have null value.

Permanent Address: Permanent address of the service personnel. It is an enterable field. It can have null value.

City: Permanent city of the service personnel. It is a list field. Value comes from city master. It can have null value.

State: State of the service personnel. It is a list field. Value comes from state master. It can have null value.

Telephone No.: This is the contact no. (Permanent address) of the service personnel. It is enterable field. It can have null values.

Police Station: It is enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is enterable field. User can enter pin code. It can have null value.

NOK Details

NOK1

Name: It is an enterable field. User can enter the first and last name of NOK. If Patient is dependent then system displays NOK Name as service personnel name. It can have null value.

Relation: It is a selectable field. User can select the patient's relation with NOK, value come from relation master. It cannot have null value if NOK name entered.

Contact No.: It is enterable field. User can enter the contact no. of NOK. It cannot have null value if NOK name entered.

Address: It is enterable field. User can enter the address of NOK. It cannot have null value if NOK name entered.

Police Station: It is enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is enterable field. User can enter pin code. It can have null value.

NOK2

Name: It is an enterable field. User can enter the first and last name of NOK. If Patient is dependent then system displays NOK Name as service personnel name. It can have null value.

Relation: It is a selectable field. User can select the patient's relation with NOK, value comes from relation master. It cannot have null value if NOK name entered.

Contact No.: It is enterable field. User can enter the contact no. of NOK. It cannot have null value if NOK name entered.

Address: It is enterable field. User can enter the address of NOK. It cannot have null value if NOK name entered.

Police Station: It is enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is enterable field. User can enter pin code. It can have null value.

Medical Details

Blood group: This is the Blood Group of the service personnel. This is a list element (Selectable). The value comes from Blood Group master. It can have null values.

Family History: It is a selectable field. User can select complain related family history, if any. It can have null value.

Present Med Cat: It is a selectable field. User can select present medical category. It can have null value.

Period: It is enterable field. It can have null value.

Date: It is enterable field the date in DD/MM/YYYY format. It can have null value.

Allergies: On click of "Allergies" a pop up appears having option to enter multiple allergies with description, type, severity, reaction and since.
The same detail displays at OPD module, and if at OPD module allergies details have entered then it should be display here.

Smoker

<10 It is a logical field. User can check it if patient smokes more than 10 times. It can have null value.

>10 It is a logical field. User can check it if patient smokes less than 10 times. It can have null value.

Alcohol: It is a selectable element. User can select the value from drop down (Occasional/ Moderate/ Heavy). It can have null value.

Immunization: On click of “Immunization details” a popup appears having option to enter multiple immunizations details with date.

Med Exam: It is a logical field. User checks it, if service personnel reporting for medical exam. It can have null value.

Med Board: It is logical field. User checks it if service personnel reporting for medical board. It can have null value.

Send: It allows user to Send/submit record. The data moves to the respective module for which the visit is created. On click of the Send button the patient get register, if unregistered and HIN is generated, visit no. and token no. get generated and the same get display in OPD waiting list.

Reset: It clears the existing records of the screen and allows user to enter the fresh records.

Previous visit: It facilitates user to view the previous visit details of the patient.

Appointment: It facilitates user to enter/ view appointment details.

Track Pt: On click of the Track patient button a new screen displays to track the patient visited time to the different department for the date.

Import HIC: It fetches the service personnel and dependant details from HIC database and saves the data in SMC database at the time of Submitting the record.

Update HIC: System facilitates to update HIC database from IAF Mednet database.

Search: It enables user to search service personnel/ patient record using multiple searching criteria.

Print: It enables user to print the registration card based on the service no. and HIN entered.

Immunization Details

On click of “Immunization Details” hyperlink the form appears, where user can enter vaccine details and it also displays the previously entered details.

Vaccine: It’s an enterable field. Based on initial entered string it displays vaccine name, where user can select it. It cannot have null value.

Dose: It's an enterable field. It may have a null value.

Route: It's an enterable field. It may have a null value.

Given On: It's an enterable field. It may have a null value.

Batch No: It's an enterable field. It may have a null value.

DOM: It's an enterable field. User can enter date of manufacturing of vaccine. It may have a null value.

DOE: It's an enterable field. User can enter date of expiry of vaccine. It may have a null value.

Add: It adds a new row.

Delete: It deletes the selected row.

OK: It saves the record.

Cancel: It closes the Immunization pop-up.

Medical Exam Waiting List

This is the first step of the Medical Exam process after registration. Once the service personnel get registered the service personnel details appear in the Waiting List of Medical Assistant.

By waiting list, it means the list of all service personnel with their service details like service No., Rank, unit etc. are displayed in this list for the process of Medical Exam.

UPDATE | RESET | FORWARD TO MO

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit, system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

Date of Exam: It is the medical exam date. System display the current server date by default. It's a modifiable field.

Place of Exam: It is the SMC name. The value is displayed automatically from database.

Authority: It is an enterable field. By default it displays IAP 4303 (4th Ed)

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

Name: Name of the service personnel. The value comes from registration table.

Unit/Ship: Unit/Ship of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/ Trade: Branch or Trade of the service personnel. The value comes from registration table.

DOB: Date of Birth of the service personnel. The value comes from registration table.

Age: Age of the service personnel. The value comes from registration table.

Gender: Gender of the service personnel. The value comes from registration table.

Type of Commission: Type of commission of the service personnel. The user may select PC or SSC.

DOC/DOE: Date of commission of the service personnel. The value comes from registration table.

Total Service: Total Service of the service personnel in month & year (date format). The value is displayed automatically from database.

Past Medical History: Past Medical details of the service personnel.

Present Medical Category: Present Medical Category of the service personnel. It's a selectable field. The values come from database.

Last AME Place: Location of last annual medical exam. It's an enterable field. It may have a null value.

Last AME Date: Date of last annual medical exam.
It may have a null value.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel come back with results then Medical Assistant enters those results in the form.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value gets calculated on the basis of weight and ideal weight.

BMI: Value gets calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value gets calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value are Yes or No.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision without Glass R & L: It can have null value.

Near Vision with Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The values are YES & No by default.

TM L: The values are YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload/View: It allows to user upload the Audiometry report.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is displayed here which is entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Cardio Vascular System

Pulse: It can have null value.

BP: It can have null value.

Peripheral Pulsation: It can have null value.

Heart Size: It can have null value.

Sounds: It can have null value.

Rhythm: It can have null value.

Respiratory System

Respiratory System: It can have null value.

Gastro Intestinal System

Liver: It can't have null value. It has "Not Palpable" by default

Spleen: It can't have null value. It has "Not Palpable" by default.

Central Nervous System

Higher Mental Function: It can't have null value. It has "Normal" by default.

Speech: It can't have null value. It has "Normal" by default.

Reflexes: It can't have null value. It has "Normal" by default.

Tremors: The values are Nil, Fine and Coarse.

Self Balancing Test: The values are Steady and Unsteady.

Locomotor System: It can't have null value. It has "NAD" by default.

Spine: It can't have null value. It has "NAD" by default.

Hernia: It can't have null value. It has "NIL" by default.

Hydrocele: It can't have null value. It has "NIL" by default.

Haemorrhoids: It can't have null value. It has "NIL" by default.

Breast: It can't have null value. It has "NAD" by default.

Gynecology Exam System

Menstrual History: It may have a null value.

LMP: It's an enterable field. It may have a null value.

No. of pregnancy: It's an enterable field. It may have a null value.

No. of Abortions: It's an enterable field. It may have a null value.

No. of children: It's an enterable field. It may have a null value.

Last Confinement on: It's an enterable field. It may have a null value.

Vaginal Discharge: It's an enterable field. It may have a null value. By default it displays NIL.

Prolapse: It's an enterable field. It may have a null value. By default it displays NIL.

USG Abdomen: It may have a null value.

Upload Report: On click of the button a popup screen appears having option to upload scanned documents.

Immunization Details

Vaccine: It's an enterable field. Based on initial entered string it displays vaccine name, where user can select it. It cannot have null value.

Dose: It's an enterable field. It may have a null value.

Route: It's an enterable field. It may have a null value.

Given On: It's an enterable field. It may have a null value.

Batch No.: It's an enterable field. It may have a null value.

DOM: It's an enterable field. User can enter date of manufacturing of vaccine. It may have a null value.

DOE: It's an enterable field. User can enter date of expiry of vaccine. It may have a null value.

Add: It adds the new row.

Delete: It deletes the selected row.

OK: It saves the record.

Cancel: It closes the Immunization pop-up.

Life Style Factors

Coronary Risk Factors: It's an enterable field. It may have a null value.

Family History: The values are DM/ Malignancy/ HTN/ IHD/ Hyperlipidemia / Arthritis/ Epilepsy/ Other.
On selecting "Other", a new text box should appear, where user can enter a new disease.

Smoker

<10 It is a logical field. User can check it if patient smokes more than 10 times. It can have null value.

>10 It is a logical field. User can check it if patient smokes less than 10 times. It can have null value.

Alcohol: The values are Occasional/Moderate/Heavy.

Allergies: On click of the button a pop up screen appears having option to enter/ view multiple allergies details of the patient.

Next Appointment Date: It's an enterable field for next appointment date.

Submit: It saves the data. User can save the form multiple times. On submission of the form Dental and Investigation requisition automatically flows to the Dental and Lab but if Medical Assistant has selected the Refer to MH for Dental or Investigation then system asks to print the Dental and Investigation requisition for the particular test.

Reset: It resets the form.

Forward: It forwards the details to Medical Officer.

MO Waiting List

Below screen that is Medical Officer waiting list appears as soon as medical assistant forwards the AFMSF-3B form of any individual.

By waiting list, it means the list of all service personnel with their service details like service No., Rank, unit, last medical exam, and medical category etc. displays in this list for the process of Medical Exam.

UPDATE | RESET | VALIDATE | REJECT | INITIATE NEW MEDICAL

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

Date of Exam: It is the medical exam date. System displays the current server date by default. It's a modifiable field.

Place of Exam: It be the SMC name. The value is displayed automatically from database.

Authority: It'll be an enterable field. By default it'll display IAP 4303 (4th Ed)

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

Unit: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/Trade: Branch or Trade of the service personnel. The value comes from registration table.

Date of Birth: Date of Birth of the service personnel. The value comes from registration table.

Age: Age of the service personnel. The value comes from registration table.

Gender: Gender of the service personnel. The value comes from registration table.

DOC/DOE: Date of commission of the service personnel. The value comes from registration table.

Total Service: Total Service of the service personnel in month & year (date format). The value is displayed automatically from database.

Past Medical History: Past Medical details of the service personnel.

Present Medical Category: Present Medical Category of the service personnel. It's a selectable field. The values come from database.

Last AME Place: Location of last annual medical exam. It's an enterable field. It may have a null value.

Last AME Date: Date of last annual medical exam. It may have a null value.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel

Total No. of Dental Points: Total No. of Dental Points of the service personnel

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel comes back with results then Medical Assistant enters those results in the form.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value gets calculated on the basis of weight and ideal weight.

BMI: Value gets calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value gets calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest Full Expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The values are Yes and No.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision without Glass R & L: It can have null value.

Near Vision with Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The values are YES & No by default.

TM L: The values are YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is displayed here which is entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Cardio Vascular System

Pulse: It can have null value.

BP: It can have null value.

Peripheral Pulsation: It can have null value.

Heart Size: It can have null value.

Sounds: It can have null value.

Rhythm: It can have null value.

Respiratory System

Respiratory System: It can have null value.

Gastro Intestinal System

Liver: It can't have null value. It has "Not Palpable" by default

Spleen: It can't have null value. It has "Not Palpable" by default.

Central Nervous System

Higher Mental Function: It can't have null value. It has "Normal" by default.

Speech: It can't have null value. It has "Normal" by default.

Reflexes: It can't have null value. It has "Normal" by default.

Tremors: The values are Nil, Fine and Coarse.

Self Balancing Test: The values are Steady and Unsteady.

Locomotor System: It can't have null value. It has "NAD" by default.

Spine: It can't have null value. It has "NAD" by default.

Hernia: It can't have null value. It has "NIL" by default.

Hydrocele: It can't have null value. It has "NIL" by default.

Haemorrhoids: It can't have null value. It has "NIL" by default.

Breast: It can't have null value. It has "NAD" by default.

Gynecology Exam System

Menstrual History: It may have a null value.

LMP: It's an enterable field. It may have a null value.

No. of pregnancy: It's an enterable field. It may have a null value.

No. of Abortions: It's an enterable field. It may have a null value.

No. of children: It's an enterable field. It may have a null value.

Last Confinement on: It's an enterable field. It may have a null value.

Vaginal Discharge: It's an enterable field. It may have a null value. By default it displays NIL.

Prolapse: It's an enterable field. It may have a null value. By default it displays NIL.

USG Abdomen: It may have a null value.

Upload Report: On click of the button a popup screen appears having option to upload scanned documents.

Immunization Details

Vaccine: It's an enterable field. Based on initial entered string it displays vaccine name, where user can select it. It cannot have null value.

Dose: It's an enterable field. It may have a null value.

Route: It's an enterable field. It may have a null value.

Given On: It's an enterable field. It may have a null value.

Batch No.: It's an enterable field. It may have a null value.

DOM: It's an enterable field. User can enter date of manufacturing of vaccine. It may have a null value.

DOE: It's an enterable field. User can enter date of expiry of vaccine. It may have a null value.

Add: It adds the new row.

Delete: It deletes the selected row.

OK: It saves the record.

Cancel: It closes the Immunization pop-up.

Life Style Factors

Coronary Risk Factors: It's an enterable field. It may have a null value.

Family History: The values are DM/ Malignancy/ HTN/ IHD/ Hyperlipidemia / Arthritis/ Epilepsy/ Other.
On selecting "Other", a new text box should appear where user can enter a new disease.

Allergies: On click of the button a pop up screen appears having option to enter/ view multiple allergies details of the patient.

Alcohol: The values are Occasional/Moderate/Heavy.

Final Observation and Medical Category

Final Observation: It's an enterable field for MO to enter his final observations. It cannot have a null value.

Medical Category Recommended: It's a selectable field. The values come from database. It cannot have a null value.

Admission: If service personnel is found unfit, and is recommended for admission, then MO may click/check this box.
Note: This maintains a status in database and appears in waiting list of reception module

Specialist Opinion: If service personnel are found unfit, and any specialist opinion is required on same, then MO may click/check this box.
Note: This maintains a status in database and generates a case sheet for review.

Signed By: It is the name of the Medical officer. It's a display field where value comes automatically from login details.

Remarks: MO may enter any remark related with service personnel's medical exam.

Update: This button allows MO to save the data in database. MO can save and open the form multiple times.
But if Service Personnel is advised for admission or specialist opinion then system generates receipt for review.
Note: After submitting the form, respective service personnel appears in MO waiting list, highlighted with "YELLOW" Color.

Validate: This button is to save and forward the form to the respective Approving Authority in case where Service Personnel is found fit for his duties.

Reject: If MO rejects the form then system asks for rejection remarks and goes back to the Medical Assistant with entered remarks. The same is shown in MA waiting list in RED Color.

Reset: It resets the form.

Approving Authority Waiting List

Below screen i.e. Approving Authority waiting list appears as soon as MO validates the AFMSF-3B form. List of all service personnel whose annual medical exam process has been validated by MO, appears here.

By waiting list, it means the list of all service personnel with their service details like service No., Rank, unit etc. displays in this list for the process of Medical Exam.

Life Style Factors

Coronary Risk Factors: The value is displayed automatically from database.

Family History: The value is displayed automatically from database.

Allergies: The value is displayed automatically from database.

Alcohol: The value is displayed automatically from database.

Final Observation and Medical Category

Final Observation: The value is displayed automatically from database.

Medical Category Recommended: The value is displayed automatically from database.

Admission: The value is displayed automatically from database.

Specialist Opinion: The value is displayed automatically from database.

Signed By: The value is displayed automatically from database.

Remarks: The value is displayed automatically from database.

Final Observation By Approving Authority

Final Observation: The value is displayed automatically from database.

Signed By: The value is displayed automatically from database.

Remarks: The value is displayed automatically from database.

Final Observation By Perusing Authority

Final Observation: It's an enterable field for Perusing Authority to enter his final observations. It cannot have a null value.

Remarks: Perusing Authority may enter any remark related with service personnel's medical exam.

Signed By: It is the name of Perusing Authority. It's a display field where value comes automatically from login details.

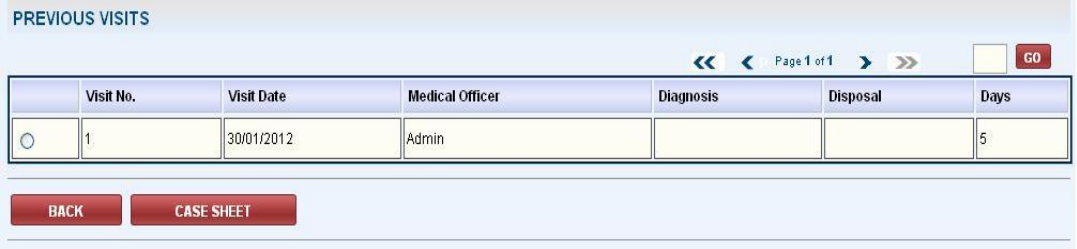
Validate: Clicking on this button, completes the medical Exam and details are forwarded on all levels i.e. SMC, Command etc.

Reject: If Perusing Authority rejects the form then system asks for rejection remarks and goes back to the Approving Authority. The same is shown in Approving Authority waiting list in RED Color.

Reset: It resets the form.

Previous Visits

When MO clicks the previous visits button, system displays the list of the previous visits details of the particular patient in the grid.



Radio button: User can select it if case sheet for concerned visit needed to view or print.

Visit No.: It displays the visit no. On click of any row label, visit details are displayed.

Visit Date: It displays date of visit.

Medical Officer: It displays the name of medical officer (with his/her Rank) of that visit. On click of any row label, visit details are displayed.

Diagnosis: It displays the diagnosis given by MO for that visit. On click of any row label, visit details are displayed.

Disposal: It displays the disposal of that visit. On click of any row label, visit details are displayed.

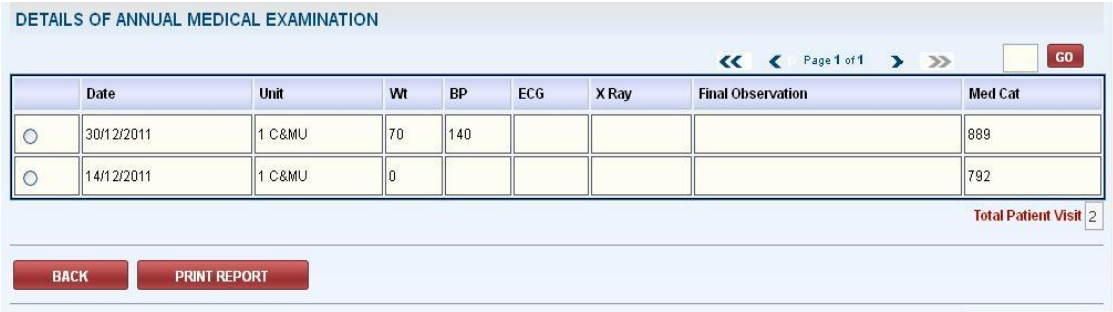
No. of Day(s): It displays no. of days of disposal.

Back: It navigates the cursor to OPD main screen.

Case Sheet: It displays the case sheet of selected (radio button) visit no. User can view or print case sheet as required.

Previous Medical Exam Details

The screen facilitates MA to view previous medical examination details of the service personnel.



Date: It displays the date of Medical examination held. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

Unit: It displays the unit of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

Wt: It displays the weight of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

BP: It displays the BP of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

ECG: It displays the result of ECG of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

X-Ray: It displays the result of x-ray of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

Final Observation: It displays the final observation, of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

Med. Cat.: It displays the medical category if any, of service personnel at the time of medical examination. On click of any row label, Annual medical examination detail (AFMSF-3B) is displayed.

Back: It navigates the cursor to Annual Medical Exam (AFMSF-3B) screen.

Previous Medical Board Details

The screen facilitates MA to view previous medical board details of the service personnel.

Date: It displays the date of Medical board held. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Unit: It displays the unit of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Wt.: It displays the weight of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

BP: It displays the BP of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Med Cat: It displays the medical category of service personnel awarded by the medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Disability %: It displays the disability %, if any, of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Attributability: It displays the final Attributability (Yes/No). On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Aggravation: It displays the final Aggravation (Yes/No). On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Injury Report/ Charter of Duties: It displays the Injury Report status of service personnel at the time of medical board.
Value is “Yes/No/NA”. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Charter of Duties: It display the charted of duties of service personnel. Value is “Yes/No/NA”. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

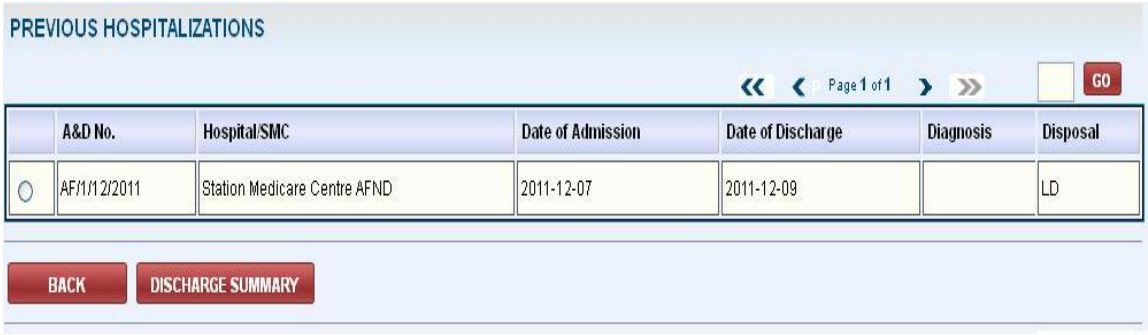
Empl Restrictions: It displays the Empl Restrictions if any, of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Medication: It displays the medication if any, of service personnel at the time of medical board. On click of any row label, Medical board proceeding detail (AFMSF-15) is displayed.

Back: It navigates the cursor to OPD main screen.

Previous Hospitalizations

When MA clicks on Previous Hospitalizations button, system displays the list of previous hospitalization of that respective patient/service personnel in the grid having option to view/ print the discharge summary.



Radio button: User can select it if discharge summary for concerned hospitalization is required to view or print.

A&D No.: It displays the A&D no. of that hospitalization.

Hospital/ SMC: It displays the hospital/ SMC name where patient/service personnel were admitted.

Date of Admission: It displays date of admission.

Date of Discharge: It displays date of discharge.

Diagnosis: It displays the diagnosis of that hospitalization.

Disposal: It displays the disposal of that hospitalization.

Back: It navigates to Annual Medical Exam (AFMSF-3B) screen.

Discharge Summary: It displays the discharge summary of selected (radio button) A&D No. User can view or print discharge summary as required.

Medical Exam on Release / Discharge AFMSF – 18 [MA View]

From Medical Exam List [Please Refer Screen Id: 001], when medical assistant selects any record where Medical Exam Type is “AFMSF-18” then the following screen opens.

This screen carries complete, process of Medical Exam of respective service personnel.

This screen collects the medical details of that particular service personnel, on the basis of which higher authority decides it’s medical category and other things.

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

Authority of Board: It is an enterable field.

Place: It is the name of the SMC.

Date: It is the current date of the server, but user may modify it.

Date of Release: It is an enterable field.

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

DOB: Date of Birth of the service personnel. The value comes from registration table.

Unit/Ship: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/Trade: Branch or Trade of the service personnel. The value comes from registration table.

Total Service: It is a display field. The value comes from registration table.

Total Flying Hours: It is an enterable field.

Permanent Address: It is an enterable field.

Date of Commission/Enrollment: Date of commission of the service personnel. The value comes from registration table.

Identification Mark a & b: It is an enterable field.

Service Details

Sl No.: It is generate after click on Add or Delete Button.

From: It is an enterable field.

To: It is an enterable field.

Place: It is an enterable field.

P/F: The values are Peace/Field/MFA.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Disease, Wound or Injury Details

Sl No.: It is generated after click on Add or Delete Button.

Disability: It is an enterable field.

Date: It is an enterable field.

Place: It is an enterable field.

Rank: The values come from Rank master.

Where treated: It is an enterable field.

Approximate date and period treated

From: It is an enterable field.

To: It is an enterable field.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Details and Dates of any Disability Mentioned Above before the Armed Forces: It's an enterable field. It may have a null value.

Disability due to Service: It's a selectable field. MA may choose 'yes' or 'no'. It cannot have a null value.

Other Health Information: It's an enterable field. It may have a null value.

Signature of Witness: It's an enterable field. It cannot have a null value.

Signature: It's an enterable field. It cannot have a null value. It'll be the signature of respective service personnel.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel come back with results then Medical Assistant enters those results in the form.

Investigations

Template: It displays the investigation templates which user create.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is display here which is entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value gets calculated on the basis of weight and ideal weight.

BMI: Value gets calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value gets calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value is Yes and No.

Cardio Vascular System

Pulse: It can have null value.

BP: It can have null value.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Gynecology Exam

Menstrual History: It may have a null value.

LMP: It's an enterable date field. It may have a null value.

No. of pregnancy: It's an enterable field. It may have a null value.

No. of Abortions: It's an enterable field. It may have a null value.

No. of children: It's an enterable field. It may have a null value.

Date of last confinement: It's an enterable field. It may have a null value.

Vaginal Discharge: It's an enterable field. It may have a null value.

Prolapse: It's an enterable field. It may have a null value.

USG Abdomen: It may have a null value.

Upload Report: On click of the button a popup screen appears having option to upload scanned documents.

Submit: It'll save the data in database. MA can save and open the form multiple times. On submission of the form Dental and Investigation requisition automatically flows to the Dental and Lab.
But if Service Personnel is referred to MH for Dental or Investigation, then system generates receipt for review.
Note: After submitting the form, respective service personnel appear in MA waiting list, in Yellow Color.

Reset: It resets the form.

Forward: It forwards the details to Medical Officer.

Medical Exam on Release / Discharge AFMSF – 18 [MO View]

Once the AFMSF-18 form is forwarded by MA, it'll appear in the waiting list of MO [Please Refer Screen Id: 007], thereafter, MO may click on any record where "Medical Exam Type" is "Medical Exam on Release/ Discharge AFMSF-18" this displays the below Screen.

This screen carries complete, process of Medical Exam of respective service personnel.

This screen collects the medical details of that particular service personnel, on the basis of which higher authority decides it's medical category and other things.

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

Authority of Board: It is an enterable field.

Place: It is the name of the SMC.

Date: It is the current date of the server, but user may modify it.

Date of Release: It is an enterable field.

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

DOB: Date of Birth of the service personnel. The value comes from registration table.

Unit/Ship: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/Trade: Branch or Trade of the service personnel. The value comes from registration table.

Total Service: It is a display field. The value comes from registration table.

Total Flying Hours: It is an enterable field.

Permanent Address: It is an enterable field.

DOE/DOC: Date of commission of the service personnel. The value comes from registration table.

Identification Mark a & b: It is an enterable field.

Service Details

Sl No.: It is generate after click on Add or Delete Button.

From: It is an enterable field.

To: It is an enterable field.

Place: It is an enterable field.

P/F: The values are Peace/Field/MFA.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Disease, Wound or Injury Details

Sl No.: It is generated after click on Add or Delete Button.

Disability: It is an enterable field.

Date: It is an enterable field.

Place: It is an enterable field.

Rank: The values come from Rank master.

Where treated: It is an enterable field.

Approximate date and period treated

From: It is an enterable field.

To: It is an enterable field.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Details and Dates of any Disability Mentioned Above before the Armed Forces: It's an enterable field. It may have a null value.

Disability due to Service: It's a selectable field. MA may choose 'yes' or 'no'. It cannot have a null value.

Other Health Information: It's an enterable field. It may have a null value.

Signature of Witness: It's an enterable field. It cannot have a null value.

Signature: It's an enterable field. It cannot have a null value. It'll be the signature of respective service personnel.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel come back with results then Medical Assistant enters those results in the form.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is display here which is entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value gets calculated on the basis of weight and ideal weight.

BMI: Value gets calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value gets calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value is Yes and No.

Cardio Vascular System

Pulse: It can have null value.

BP: It can have null value.

Peripheral Pulsation: It can have null value.

Heart Size: It can have null value.

Sounds: It can have null value.

Rhythm: It can have null value.

Respiratory System: It can have null value.

Gastro Intestinal System

Liver: It can't have null value. It has "Not Palpable" by default

Spleen: It can't have null value. It has "Not Palpable" by default.

Central Nervous System

Higher Mental Function: It can't have null value. It has "Normal" by default.

Speech: It can't have null value. It has "Normal" by default.

Reflexes: It can't have null value. It has "Normal" by default.

Tremors: The values is Nil, Fine and Coarse.

Self Balancing Test: The values are Steady and Unsteady.

Locomotor System: It can't have null value. It has "NAD" by default.

Spine: It can't have null value. It has "NAD" by default.

Hernia: It can't have null value. It has "NIL" by default.

Hydrocele: It can't have null value. It has "NIL" by default.

Haemorrhoids: It can't have null value. It has "NIL" by default.

Breast: It can't have null value. It has "NAD" by default.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision without Glass R & L: It can have null value.

Near Vision with Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The values are YES & No by default.

TM L: The values are YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Gynecology Exam

Menstrual History: It may have a null value.

LMP: It's an enterable date field. It may have a null value.

No. of pregnancy: It's an enterable field. It may have a null value.

No. of Abortions: It's an enterable field. It may have a null value.

No. of children: It's an enterable field. It may have a null value.

Date of last confinement: It's an enterable field. It may have a null value.

Vaginal Discharge: It's an enterable field. It may have a null value.

Prolapse: It's an enterable field. It may have a null value.

USG Abdomen: It may have a null value.

Upload Report: On click of the button a popup screen appears having option to upload scanned documents.

Final Observation and Medical Category By MO

Final Observation: Final Observation is entered by MO. It cannot have a null value.

Medical Category Recommended: It's a selectable field. MO may choose recommended category from the values in combo box. The values in combo box appear automatically from database. It cannot have a null value.

Admission: If service personnel is found unfit, and is recommended for admission, then MO may click/check this box.
Note: This removes the service personnel from waiting list and process ends.

Specialist Opinion: If service personnel are found unfit, and any specialist opinion is required on same, then MO may click/check this box.
In case individual comes back after spl opinion and is considered fit, MO validates the form and may upload the spl report.
Note: This maintains a status in database and generates a case sheet for review.

Signed By: It displays the name of respective Medical officer. It'll come automatically from login details.

Remarks: It'll display the remarks entered by MO.

Update: Provision to upload specialist opinion (If any)

Final Observation and Medical Category By MO

Final Observation: Final Observation is entered by MO. It cannot have a null value.

Medical Category Recommended: It's a selectable field. MO may choose recommended category from the values in combo box. The values in combo box appear automatically from database. It cannot have a null value.

Admission: If service personnel is found unfit, and is recommended for admission, then MO may click/check this box.
Note: This removes the service personnel from waiting list and process ends.

Specialist Opinion: If service personnel are found unfit, and any specialist opinion is required on same, then MO may click/check this box.
In case individual comes back after spl opinion and is considered fit, MO validates the form and may upload the spl report.
Note: This maintains a status in database and generates a case sheet for review.

Signed By: It displays the name of respective Medical officer. It'll come automatically from login details.

Remarks: It'll display the remarks entered by MO.

Update: Provision to upload specialist opinion (If any)

Validate: It forwards the details to OC Unit/Ship, which appears in waiting list of OC (approving authority)

Reject: If MO rejects the form, then it'll appear in the waiting list of MA, highlighted with "RED Color"

Reset: It resets the form.

Medical Exam on Release / Discharge AFMSF-18 [OC Unit]

Once the AFMSF-18 form is validated by MO, it'll appear to the waiting list of Approving Authority [Please Refer Screen Id; 09], thereafter, Approving Authority may click on any record where "Medical Exam Type" is "AFMSF-18" which displays below Screen.

This screen displays the medical details of that particular service personnel, on the basis of which approving authority decides it's medical category and other things.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

Any evidence of Otitis Medi: It's an enterable field. It may have a null value.

Physical Development

Height (without shoes): It's an enterable field. It cannot have a null value.

Weight: It's an enterable field. It cannot have a null value.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel come back with results then Medical Assistant enters those results in the form.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is displayed here which be entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Submit: It'll save the data in database. MA can save and open the form multiple times. On submission of the form Dental and Investigation requisition automatically flows to the Dental and Lab. But if Service Personnel is referred to MH for Dental or Investigation, then system generates receipt for review.
Note: After submitting the form, respective service personnel appear in MA waiting list, in Yellow Color.

Reset: It resets the form.

Forward: It forwards the details to Medical Officer.

Medical Exam for Primary/Ext of Service AFMSF-2A [MO View]

Once the AFMSF-2A form is forwarded by MA, it'll appear in waiting list of MO [Please Refer Screen Id: 007], thereafter, MO may click on any record where "Medical Exam Type" is "Medical Exam for Primary/Ext of Service AFMSF-2A" this displays the below Screen.

This screen carries complete, process of Medical Exam of respective service personnel.

This screen collects the medical details of that particular service personnel, on the basis of which higher authority decides it's medical category and many other things.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is displayed here which be entered by Lab. In case of MH Referral Medical Assistant enters the Result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Mental Capacity and Emotional Stability

Speech: It's an enterable field. By default it displays "Normal". It cannot have a null value.

Mental Retardation: It's an enterable field. By default it displays "NIL". It cannot have a null value.

Emotional Stability: It's an enterable field. By default it displays "NIL". It cannot have a null value.

Immunization Details

Vaccine: It's an enterable field. Based on initial entered string it displays vaccine name, where user can select it. It cannot have null value.

Dose: It's an enterable field. It may have a null value.

Route: It's an enterable field. It may have a null value.

Given On: It's an enterable field. It may have a null value.

Batch No.: It's an enterable field. It may have a null value.

DOM: It's an enterable field. User can enter date of manufacturing of vaccine. It may have a null value.

DOE: It's an enterable field. User can enter date of expiry of vaccine. It may have a null value.

Add: It adds the new row.

Delete: It deletes the selected row.

Life Style Factors

Coronary Risk Factors: It's an enterable field. It may have a null value.

Family History: The values are DM/Malignancy/HTN/IHD/ Hyperlipidemia / Arthritis/ Epilepsy/ Other.
On selecting "Other", a new text box should appear where user can enter a new disease.

Allergies: On click of the button a pop up screen appears having option to enter/ view multiple allergies details of the patient.

Alcohol: The values are Occasional/Moderate/Heavy.

Next Appointment Date: It's an enterable field for next appointment date.

Final Observation and Medical Category By MO

Final Observation: It's an enterable field for MO to enter his final observations. It cannot have a null value.

Medical Category Recommended: It's a selectable field. The values come from database. It cannot have a null value.

Admission: If service personnel is found unfit, and is recommended for admission, then MO may click/check this box.
Note: This maintains a status in database and appears in waiting list of reception module

Specialist Opinion: If service personnel are found unfit, and any specialist opinion is required on same, then MO may click/check this box.
Note: This maintains a status in database and generates a case sheet for review.

Signed By: It is the name of the Medical officer. It's a display field where value comes automatically from login details.

Remarks: MO may enter any remark related with service personnel's medical exam.
