Introduction

Station Medicare Centers (SMCs) are the primary Medicare facilities at Air Force Wings and Stations. SMCs are small hospitals. They mainly function as OPD polyclinics with comprehensive lab, and provide physiotherapy, radiology and dental services. Additionally, they have medical admin module meeting stores, dispensary, aviation medicine, medical stats, and medical boards. The inpatient facility is limited.

The requirement is to develop web based application software integrated with existing available and underdevelopment IAF Medicare modules. This software is similar to hospital information system software in terms of generic content but the scope, functionality, presentation and outcomes will be different.

The software is smart, interactive, user friendly with more prompts to assist doctors and paramedics in all respects of medical care. Medical stores module provides for modern inventory control and cost analysis. Medical exam and medical board provides for integration with existing database software (Oracle based) and document management software (Archi doc).

The software is a comprehensive tool not only for quick paperless day to day functioning of the SMC but also provides for data search, analysis of time and trends, across all relevant fields to give meaningful health data for further research, analysis and planning.

Medical Exam Module

The Medical Board module takes care about the board activities details such as-

- Medical Categorization is a system by which individual's physical and mental fitness is determined vis-à-vis his/her employability for performing duties of a specific branch in an efficient manner.

- At the time of initial occurrence of the disease or disability, or at a subsequent time, towards the requirement of providing sheltered and restricted employment to an affected individual is decided during categorizations.

- Whenever an individual falls ill the first time Form 15 and during re-categorization form 15A or Form – 3B is raised.

- The category is given for a specified period which is given in weeks. The next review or re-categorization board is then conducted.

- If the medical category is a temporary cat for 24 weeks (T-24) then the board becomes due by adding 168 days to the board date, if it is T-12 weeks then add 84 days, if it is T-04 weeks then add 28 days.

- For permanent category the board is held after a year so 365 days are added.

- Officers are categorized as aerial and ground category. Aerial (A) is divided into A1, A2, A3 and A4. Similarly ground or (G) category is divided into G1, G2, G3 and G4. A1 category is compatible only with G1. A4 cat is compatible with all G categories.

- Each Officer, Airman, ground duty and Aircrew shall be awarded appropriate Aerial (A) and Ground (G) category.

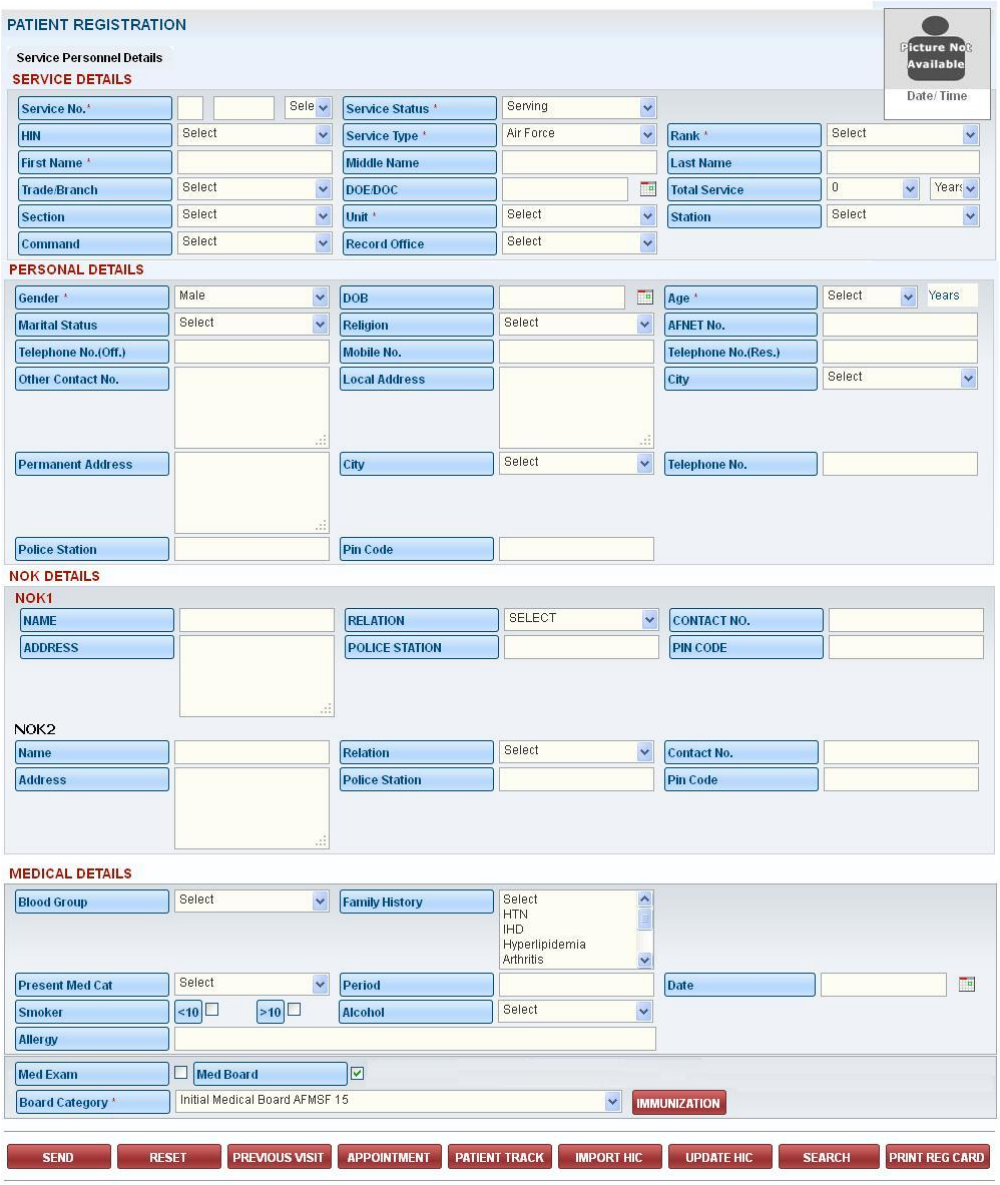
Registration

Service Personnel reports to the Medical Board department for their medical board. Medical Assistant registers the service personnel for respective medical board type. Registration can also be through Reception, when required (based on local policy).

Medical assistant enters the demographic information of the service personnel and select the medical board type. If service personnel are already registered in IAF MEDNET then medical assistant need to enter only service no of the service personnel rest of the details populated automatically, then he needs to select the respective medical board type.

If service personnel present the HIC card then as medical assistant authenticates the HIC card, service personnel details populate automatically from HIC card and he needs to select the medical board type only.

Data of Initial Medical Exam (AFMSF – 2A), Latest Annual Medical Exam (AFMSF – 3B) and latest Medical Board (AFMSF – 15) also get transfer from HIC card to IAFMEDNET.



Service No.: It is an enterable field. Here, the service no. of the service personnel should be entered with respective prefix or suffix. It is a unique number assigned to the service personnel. It cannot have null values.

Service Status: The service status of the service personnel should be entered. It may be Serving, Ex. Serving, and Civilian etc. This is a list element (Selectable). The values come from Service status Master. It cannot have null values.

HIN: Hospital Index Number (HIN) combo is populated based on the service no. entered. It is a combination of Service Type/Service status/Service number/ Relation to the service personnel/ Serial No.
It is a unique no for the entire patient care system. This no. got assigned to the patient at the time of registration and it is the same for life time for that particular patient.

Service Type: The service type of the service personnel should be entered. It may be Air Force, Navy, Army, etc. This is a list element (Selectable). In case of Service type “Civilian” Service no., Service personnel name and other service related detail is disabled. The values come from Service Type Master. It cannot have null values.

Rank: The Rank of the service personnel. This is a list element (Selectable). The values come from Rank Master. It fetches the record based on the selected service type. It cannot have null values.

First Name: The First Name of the Service Personnel. It is an enterable field it cannot have null values it can contain alphabets a-z.

Middle Name: The Middle Name of the Service Personnel. It is an enterable field it can have null values it can contain alphabets a-z.

Last Name: The Last Name of the Service Personnel It is an enterable field it can have null values it can contain alphabets a-z.

Trade/Branch: This is the name of Trade/Branch of the service personnel. The values come from Trade/Branch master. It can have null value.

DOE/DOC: Date of enrollment/ commission of the service personnel. It is an enterable field. It can have null value.

Total Service: Total serving time of the service personnel. It got calculated as per DOE/DOC entered, user cannot change the value. If DOE/DOC not entered then user can select the total service in years/ months or days. It can have null value.

Section: This is the name of Section of the service personnel. It is a list element. The values come from Section Master. It can have null values.

Unit: This is the Unit of the service personnel. It is a list element. The values come from Unit master. It can have null values.

Station: This is the Station of the service personnel. The values come from Station Master. It can have null Values.

Command: This is the command name of the service personnel. The values come from Command Master. It can have null Values.

Record Office: This is a list element (Selectable). The value comes from Record office master. It can have null values.

Personal Details

Gender: This is a list element (Selectable). The value comes from gender master. It cannot have null values.

DOB (Date of Birth): This is an enterable field in the format of DD/MM/YYYY. It can have null values.

Age: This is an enterable field. The system calculates the approximate age if date of birth has been entered. If DOB is not available, then the approximate age of the patient is entered. It cannot have null values. It can have numbers from 18 to 120 years.

Marital Status: This is the Marital Status of the service personnel. The values are Unmarried, Married, Divorcee, Separated. It can have null value.

Marriage Date: This is an enterable field in the format of DD/MM/YYYY. It can have null values.

Religion: This is the Religion of the service personnel. This is a list element (Selectable). The value comes from Religion master. It can have null value.

AFNET No.: It is enterable field. It can have null value.

Telephone No. (Off.): This is the Telephone no. (Office) of the service personnel. It is enterable field. It can have null values.

Mobile No: It is the mobile no. of the service personnel. It is enterable field. It can have null values.

Telephone No. (Res.): This is the Telephone no. (Residence) of the service personnel. It is enterable field. It can have null values.

Other Contact Nos: User can enter multiple contact nos. It is enterable field. It can have null values.

Local Address: Local address of the service personnel. It is an enterable field.
It can have null value.

City: Local city of the service personnel. It is a list field. Value comes from city master. It can have null value.

State: State of the service personnel. It is a list field. Value comes from state master. It can have null value.

Permanent Address: Permanent address of the service personnel. It is an enterable field. It can have null value.

City: Permanent city of the service personnel. It is a list field. Value comes from city master. It can have null value.

State: State of the service personnel. It is a list field. Value comes from state master. It can have null value.

Telephone No.: This is the contact no. (Permanent address) of the service personnel. It is enterable field. It can have null values.

Police Station: It is an enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is an enterable field. User can enter pin code. It can have null value.

NOK Details

NOK1

Name: It is an enterable field. User can enter the first and last name of NOK. If Patient is dependent then system displays NOK Name as service personnel name. It can have null value.

Relation: It is a selectable field. User can select the patient's relation with NOK, value come from relation master. It cannot have null value if NOK name entered.

Contact No.: It is an enterable field. User can enter the contact no. of NOK. It cannot have null value if NOK name entered.

Address: It is an enterable field. User can enter the address of NOK. It cannot have null value if NOK name entered.

Police Station: It is an enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is an enterable field. User can enter pin code. It can have null value.

NOK2

Name: It is an enterable field. User can enter the first and last name of NOK. If Patient is dependent then system displays NOK Name as service personnel name. It can have null value.

Relation: It is a selectable field. User can select the patient's relation with NOK, value comes from relation master. It cannot have null value if NOK name entered.

Contact No.: It is an enterable field. User can enter the contact no. of NOK. It cannot have null value if NOK name entered.

Address: It is an enterable field. User can enter the address of NOK. It cannot have null value if NOK name entered.

Police Station: It is an enterable field. User can enter local or nearest police station name. It can have null value.

Pin Code: It is an enterable field. User can enter pin code. It can have null value.

Medical Details

Blood group: This is the Blood Group of the service personnel. This is a list element (Selectable). The value comes from Blood Group master. It can have null values.

Family History: It is a selectable field. User can select complain related family history, if any. It can have null value.

Present Med Cat: It is a selectable field. User can select present medical category. It can have null value.

Period: It is an enterable field. It can have null value.

Date: It is an enterable field the date in DD/MM/YYYY format. It can have null value.

Allergies: On click of "Allergies" a popup appears having option to enter multiple allergies with description, type, severity, reaction and since.
The same detail displays at OPD module, and if at OPD module allergies details have entered then it should be display here.

Smoker

<10: It is a logical field. User can check it if patient smokes more than 10 times. It can have null value.

>10: It is a logical field. User can check it if patient smokes less than 10 times. It can have null value.

Alcohol: It is a selectable element. User can select the value from drop down (Occasional/ Moderate/ Heavy). It can have null value.

Immunization: On click of “Immunization details” a popup appears having option to enter multiple immunizations details with date.

Med Exam: It is a logical field. User checks it, if service personnel reporting for medical exam. It can have null value.

Med Board: It is a logical field. User checks it if service personnel reporting for medical board. It can have null value.

Send: It allows user to Send/submit record. The data moves to the respective module for which the visit is created. On click of the Send button the patient got register, if unregistered and HIN is generate, visit no. and token no. got generated and the same got display in OPD waiting list.

Reset: It clears the existing records of the screen and allows user to enter the fresh records.

Previous visit: It facilitates user to view the previous visit details of the patient.

Appointment: It facilitates user to enter/ view appointment details.

Track Pt: On click of the Track patient button a new screen displays to track the patient visited time to the different department for the date.

Import HIC: It fetches the service personnel and dependant details from HIC database and saves the data in SMC database at the time of Submitting the record.

Update HIC: System facilitates to update HIC database from IAF Mednet database.

Search: It enables user to search service personnel/ patient record using multiple searching criteria.

Print: It enables user to print the registration card based on the service no. and HIN entered.

Immunization Details

On click of “Immunization Details” hyperlink the form appears, where user can enter vaccine details and it also displays the previously entered details.

Vaccine: It’s an enterable field. Based on initial entered string it displays vaccine name, where user can select it. It cannot have null value.

Dose: It's an enterable field. It may have a null value.

Route: It's an enterable field. It may have a null value.

Given On: It's an enterable field. It may have a null value.

Batch No: It's an enterable field. It may have a null value.

DOM: It's an enterable field. User can enter date of manufacturing of vaccine. It may have a null value.

DOE: It's an enterable field. User can enter date of expiry of vaccine. It may have a null value.

Add: It adds the new row.

Delete: It deletes the selected row.

OK: It saves the record.

Cancel: It closes the Immunization pop-up.

Medical Board Waiting List

Once the service personnel got registered, the service personnel details and visit details like Visit Date, Visit Time, Service No, Rank, Name, Unit, Medical Board Type and Contact No. appears in Medical Board Waiting List.

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

INITIAL: The value comes from registration or visit.

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

Unit: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/Trade: Branch or Trade of the service personnel. The value comes from registration table.

Date of Birth: Date of Birth of the service personnel. The value comes from registration table.

Age: Age of the service personnel. The value comes from registration table.

Gender: Gender of the service personnel. The value comes from registration table.

Weight: The weight of the service personnel.

Height: The height of the service personnel.

Address on leave: The address of the service personnel.

DOC/DOE: Date of commission of the service personnel. The value comes from registration table.

Record Office: The record office of the service personnel.

Ceased Duty On: Date of ceased duty.

Past Medical History: Past Medical details of the service personnel.

Medical Category prior to present Medical Board: Present Medical Category of the service personnel. It is a selectable field. The values comes from Medical Category master. It cannot have null value.

Digital Signature of Individual: Uploaded from scan file.

Date: System display Current Date and it's changeable.

Details of Present and Previous Disabilities

Sl No.: System generates.

Disability: It is an enterable field.

Date of Origin: System display Current Date and it's changeable.

Place of Origin: It is an enterable field.

Previous Medical Cat: The values come from Medical Category drop down.

Date: System display Current Date and it's changeable.

Next Due on: System display Current Date and it's changeable.

Attributability/Aggravation: It is a selectable field, the value is Attributability/Aggravation and Nil.

Remarks: It an enterable field.

Add: It adds the row.

Delete: It deletes the row.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.
Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip got printed in the same format with service personnel details. When service personnel comes back with results then Medical Assistant enters those results in the form.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value got calculated on the basis of weight and ideal weight.

BMI: Value got calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value got calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value is Yes and No.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision Without Glass R & L: It can have null value.

Near Vision With Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The value is YES & No by default.

TM L: The value is YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip got printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is display here which is entered by Lab. In case of MH Referral Medical Assistant enters the test result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Gynecology Exam

Menstrual History: It can have null value.

LMP: It has Date Picker.

No. of pregnancy: It can have null value.

No. of Abortions: It can have null value.

No. of children's: It can have null value.

Date of last confinement: It can have null value.

Vaginal Discharge: It can have null value.

Prolapse: It can have null value.

USG Abdomen: It can have null value.

Upload: It allows user to upload the scanned report.

Submit: It saves the data. User can save the form multiple times. On submission of the form Dental and Investigation requisition automatically flows to the Dental and Lab but if Medical Assistant has selected the Refer to MH for Dental or Investigation then system asks to print the Dental and Investigation requisition for the particular test.

Reset: It reset the form.

Forward: It forward the details to Medical Officer and Commanding Officer.

MO Waiting List

Once the Medical Assistant forwards the form to the Medical Officer then it is display in Medical Officer waiting list with the service personnel details like Visit Date, Visit Time, Service No, Rank, Name, Unit, Medical Board Type and Contact No. Service personnel details which, rejected by approving authority also display in grid in red color.

UPDATE | VALIDATE | REJECT | RESET | MEDICAL CASE SHEET | UPLOAD

Previous Visits: This button brings up previously visited screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

INITIAL: The value comes from registration or visit.

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

Unit: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/Trade: Branch or Trade of the service personnel. The value comes from registration table.

Date of Birth: Date of Birth of the service personnel. The value comes from registration table.

Age: Age of the service personnel. The value comes from registration table.

Gender: Gender of the service personnel. The value comes from registration table.

Weight: The weight of the service personnel.

Height: The height of the service personnel.

Address on leave: The address of the service personnel.

DOC/DOE: Date of commission of the service personnel. The value comes from registration table.

Record Office: The record office of the service personnel.

Ceased Duty On: Date of ceased duty.

Past Medical History: Past Medical details of the service personnel.

Medical Category prior to present Medical Board: Present Medical Category of the service personnel. It is a selectable field. The values come from Medical Category master. It cannot have null value.

Digital Signature of Individual: Uploaded from scan file.

Date: System display Current Date and it's changeable.

Details of Present and Previous Disabilities

Sl No.: It is system generated.

Disability: It is an enterable field.

Date of Origin: System display Current Date and it's changeable

Place of Origin: It is an enterable field.

Previous Medical Cat: The values come from Medical Category drop down.

Date: System display Current Date and it's changeable.

Next Due on: System display Current Date and it's changeable.

Attributability/Aggravation: It is selectable field; the value is Attributability/Aggravation and Nil.

Remarks: It is an enterable field.

Add: It adds the row.

Delete: It deletes the row.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip got printed in the same format with service personnel details. When service personnel comes back with results then Medical Assistant enters those results in the form.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value got calculated on the basis of weight and ideal weight.

BMI: Value got calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value got calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value is Yes and No.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision Without Glass R & L: It can have null value.

Near Vision With Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The values are YES & No by default.

TM L: The values are YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip got printed of the selected tests. When service personnel comes back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is display here which is entered by Lab. In case of MH Referral Medical Assistant enters the test result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Clinical Summary

Present Conditions: It is an enterable filed.

Medication: It is an enterable field.

Examination

Temp: It is an enterable field. User can enter Temperature of the patient. It can have null value.

Pulse: It is an enterable field. User can enter Pulse of the patient. It can have null value.

BP: It is an enterable field. User can enter Blood pressure of the patient. It can have null value.

RR: It is an enterable field. User can enter Respiration rate of the patient. It can have null value.

General Physical Exam: It is an enterable field.

Cardiovascular System: It is an enterable field.

Respiratory System: It is an enterable field.

Gastro Intestinal System: It is an enterable field.

Central Nervous System: It is an enterable field.

Local Examination: It is an enterable field.

Remarks: It is an enterable field.

Referred to MH: In case of MH referral required for the patient, MO can check this field. Once it checked this field the Select Hospital Name Combo should be display.

Select Hospital: Hospital Names should be display from Hospital Master.

Referred to: It is a multiple selectable element. User can select the internal consulting department, if required.

Medical Board Details

Medical Category now Recommended: The values comes from Medical Category Master.

Duration: No. of Days for the Med Cat.

Place of Next Categorization Board L: It is an enterable field.

Date of Next Board: It is an enterable field.

Opinion of Medical Board: It is an enterable field.

Dissent Notes: It is an enterable field.

Composite%: It is an enterable field.

Employability Restrictions: It is an enterable field.

Instructions: It is an enterable field.

Signature of Individuals: It is an enterable field.

Date: System is display current date. It is changeable.

Member 1: The Value is display from Employee Master for selected SMC at login time.

Member 2: The Value is display from Employee Master for selected SMC at login time.

President: The Value is display from Employee Master for selected SMC at login time. When login name and selected president name is same then this form is validated.

Remarks: It is an enterable field.

Update: It saves the data. User can save the form multiple times. On submission of the form Dental and Investigation requisition automatically flows to the Dental and Lab but if MO has selected the Refer to MH for Dental or Investigation then system asks to print the Dental and Investigation requisition for the particular test.

Validate: The button is enable only for president. This button is not enabling for MO login.

Reject: MO can reject the form with their remarks.

Reset: It reset the form.

Medical Case Sheet: MO can generate Case sheet after click on this button.

Forward to Specialist: This button forwards the service personnel details and clinical summary to Specialist for his/her opinion.

Enter Specialist Opinion: MO can open specialist opinion to enter his/her opinion.

Print Specialist Opinion: Moment Specialist submits his/her form, “Forward to Specialist” button is replaced by “View Specialist Opinion”. Here MO can view the specialist opinion screen, in read only format.

Previous Visits: This button brings up previous visits screen of the Patient/Service Personnel. On clicking on any particular visit system shows the details of that respective visit.

Previous Medical Exams: This button brings up previous Medical Exams details of respective Patient/Service Personnel.

Previous Medical Boards: This button brings up previous Medical Boards details of the Patient/Service Personnel.

Previous Hospitalizations: This button brings up previous Hospitalization and other details of each hospitalization of the Patient/Service Personnel.

Authority of Board: It is an enterable field.

Place: It is the name of the SMC.

Date: It is the current date of the server, but user may modify it.

Date of Release: It is an enterable field.

Name: Name of the service personnel. The value comes from registration table.

Service No.: Service No. of the service personnel. The value comes from registration table.

Rank: Rank of the service personnel. The value comes from registration table.

DOB: Date of Birth of the service personnel. The value comes from registration table.

Unit/Ship: Unit of the service personnel. The value comes from registration table.

Service: Service Type of the service personnel. The value comes from registration table.

Branch/ Trade: Branch or Trade of the service personnel. The value comes from registration table.

Total Service: It is a display field. The value comes from registration table.

Total Flying Hours: It is an enterable field.

Permanent Address: It is an enterable field.

Date of Commission/Enrollment: Date of commission of the service personnel. The value comes from registration table.

Identification Mark a & b: It is an enterable field.

Disability

Disability: The values come from disability master. By default disabilities entered by MA displays.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Service Details

Sl No.: It is generate after click on Add or Delete Button.

From: It is an enterable field.

To: It is an enterable field.

Place: It is an enterable field.

P/F: The values are Peace/Field/MFA.

Add: It allows adding the multiple disabilities.

Delete: It allows deleting the multiple disabilities.

Disease, Wound or Injury Details

Sl No.: It is the running serial no. of the table. It'll generate automatically.

Illness/Wound/Injury: It'll display disability added above.

First Started On: It is an enterable field to enter the disability date.

First Started At: It is an enterable field to enter the place where disability occurred.

Where treated: It is an enterable field.

Approximate date and period treated From: It is an enterable field.

Approximate date and period treated To: It is an enterable field.

Add: It allows adding another new row with same fields.
Note: user can enter new disability in added new row.

Delete: It allows deleting desired row.

Did you suffer from any disability before joining the armed forces: User may select Yes or No. On selecting "Yes", below details and date grid opens.

Sl No.: It is the running serial no. of the table. It'll generate automatically.

Illness/ Wound/ Injury: Based on initial entered string, it display disability list (ICD 10 as per the discussion had with DGMS) name, where user can select it. It cannot have a null value.

First Started On: It is an enterable field to enter the disability date.

First Started At: It is an enterable field to enter the place where disability occurred.

Where treated: It is an enterable field to enter the place where that disability was treated.

Add: It allows adding another new row with same fields.

Delete: It allows deleting desired row.

Details of any incidents during your service which you think caused made your disability worse: It'll be an enterable field.
In case of wound/ injury state how they happened: It'll be an enterable field.

Medical Board or court of inquiry was held: User can select either yes or no. On clicking yes it'll ask for below fields

Injury Report: User can select either Submitted or Not Submitted.

Any other health information: It is an enterable field.

Signature of Individual: Digital Signature of individual.

Service No.: It displays automatically from database.

Rank: It displays automatically from database.

Date: It displays current system date by default. User can modify it.

Dental

Total No. of Teeth: Total No. of Teeth of the service personnel.

Total No. of Defective Teeth: Total No. of Defective Teeth of the service personnel.

Total No. of Dental Points: Total No. of Dental Points of the service personnel.

Missing: No. of missing teeth.

Unsaveable: No. of unsaveable teeth.

Condition of Gums: Condition of the gum of the service personnel.

Missing UR/UL/LR/LL: Details of missing teeth of service personnel.

Unsaveable UR/UL/LR/LL: Detail of unsaveable teeth of service personnel.

Remarks: Remarks from dentist. It can have null value.

Refer to MH: If the Dental facility is not available within the SMC then user need to click on this check box, in this case the dental investigation slip gets printed in the same format with service personnel details. When service personnel comes back with results then Medical Assistant enters those results in the form.

Physical Capacity

Height: It cannot have null value.

Weight: It cannot have null value.

Ideal Weight: Value comes from ideal weight table.

Over Weight: Value gets calculated on the basis of weight and ideal weight.

BMI: Value gets calculated automatically on the basis of height and weight.

Body Fat: It can have null value.

Waist: It can have null value.

Hip: It can have null value.

WHR: The value gets calculated on the basis of Weight and Height.

Skin Fold Thickness: It can have null value.

Chest full expiration: It can have null value.

Range of Expansion: It can have null value.

Sportsman: The value is Yes and No.

Vision

Distance Vision without Glass R & L: It can have null value.

Distance Vision with Glass R & L: It can have null value.

Near Vision Without Glass R & L: It can have null value.

Near Vision With Glass R & L: It can have null value.

CP: It can have null value.

Hearing

FWR: It can have null value.

FWL: It can have null value.

FW Both: It can have null value.

RCV: It can have null value.

LCV: It can have null value.

CV Both: It can have null value.

TM R: The values are YES & No by default.

TM L: The values are YES & No by default.

Mobility R: It can have null value.

Mobility L: It can have null value.

Nose, Throat and Sinuses: It can have null value.

Audiometry Record: It can have null value.

Upload: It allows to user upload the Audiometry report.

Investigations

Template: It displays the investigation templates which user creates.

Create Template: It allows user to create new template.

Previous Investigations: It allows user to view the previous investigation list, details and results.

Clinical Notes: User can add any clinical note.

Investigation: It is a selectable field. User can enter the investigation name, based on the test name entered the investigation name It appears in list box. User can select the Investigation name.

Refer to MH: If the test facility is not available within the SMC then user need to click on this check box, in this case the investigation slip gets printed of the selected tests. When service personnel come back with results then Medical Assistant enters those results in the form. In case of X-Ray or ECG Medical Assistant uploads the scanned Report.

Result: The result of the particular test is display here which is entered by Lab. In case of MH Referral Medical Assistant enter the test result for the particular test. In case of X-Ray or ECG Medical Assistant uploads the scanned report.

Upload: It allows user to upload ECG / X-Ray report.

Add: It allows user to add more tests.

Delete: It allows user to delete the selected row.

Cardio Vascular System

Pulse: It can have null value.

BP: It can have null value.

Peripheral Pulsation: It can have null value.

Heart Size: It can have null value.

Sounds: It can have null value.

Rhythm: It can have null value.

Respiratory System: It can have null value.

Gastro Intestinal System

Liver: It can't have null value. It has "Not Palpable" by default

Spleen: It can't have null value. It has "Not Palpable" by default.

Central Nervous System

Higher Mental Function: It can't have null value. It has "Normal" by default.

Speech: It can't have null value. It has "Normal" by default.

Reflexes: It can't have null value. It has "Normal" by default.

Tremors: The values is Nil, Fine and Coarse.

Self Balancing Test: The values are Steady and Unsteady.

Locomotor System: It can't have null value. It has "NAD" by default.

Spine: It can't have null value. It has "NAD" by default.

Hernia: It can't have null value. It has "NIL" by default.

Hydrocele: It can't have null value. It has "NIL" by default.

Haemorrhoids: It can't have null value. It has "NIL" by default.

Breast: It can't have null value. It has "NAD" by default.

Gynecology Exam

Menstrual History: It can have a null value.

LMP: It's an enterable field. It can have a null value.

No. of Pregnancies: It's an enterable field. It can have a null value.

No. of Abortions: It's an enterable field. It can have a null value.

No. of Children: It's an enterable field. It can have a null value.

Last Confinement on: It's an enterable field. It can have a null value.

Vaginal Discharge: By default it displays "Nil".

Prolapse: By default it displays "Nil".

USG Abdomen: It can have a null value.

Upload: It allows user to upload the scanned report.

Submit: It saves the data. User can save the form multiple times (second time “submit” is renamed to update). On submission of the form Investigations is sent to the Lab automatically.

Reset: It resets the form.

Forward: It forwards the details to Medical Officer and Commanding Officer.

Medical Board AFMSF – 16 (MO)

When MO clicks on any record in MO waiting list then following screen opens for Medical Officer with Medical Assistant Inputs. Medical officer is able to modify or delete the data entered by Medical Assistant and he is able to enter the other details as well. When MO validates the form then it go to the concern officer (as per flow chart) but if MO rejects the form with his/her remarks then it is forward to concern MA waiting list.
