Introduction

Station Medicare Centers (SMCs) are the primary Medicare facilities at Air Force Wings and Stations. SMCs are small hospitals. They mainly function as OPD polyclinics with comprehensive lab, and provide physiotherapy, radiology and dental services. Additionally, they have medical admin module meeting stores, dispensary, aviation medicine, medical stats, and medical boards. The inpatient facility is limited.

The requirement is to develop web based application software integrated with existing available and underdevelopment IAF Medicare modules. This software is similar to hospital information system software in terms of generic content but the scope, functionality, presentation and outcomes will be different.

The software is smart, interactive, user friendly with more prompts to assist doctors and paramedics in all respects of medical care. Medical stores module provides for modern inventory control and cost analysis. Medical exam and medical board provides for integration with existing database software (Oracle based) and document management software (Archi doc).

The software is a comprehensive tool not only for quick paperless day to day functioning of the SMC but also provides for data search, analysis of time and trends, across all relevant fields to give meaningful health data for further research, analysis and planning.

Ward Module

The Ward Management module of the software handles all the activities associated with the ward operations in a SMC. This module is used to record the ward activities like Kit Issue, Nursing Care, Case Sheet, Diet Setup, Nursing Entry, Clinical Chart, Intake Output, Patient Drugs Issue, Bed Transfer, SIL/DIL/ MLC, and Monthly Drugs Indent etc.

In short we can say that this module helps Medical Officers and Nursing Officers to store and view the inpatient clinical information. This module provides following facilities:-

1. View Admitted Patient List.
2. Patient Search
3. Issue Kit to Admitted Patient.
4. View Issued Kit List.
5. View Inpatient Case Sheet.
6. Enter Diagnosis, Treatment, Investigation, Procedure and Physiotherapy
7. Enter Nursing Care.
8. Ward Wise Diet Setup.
9. View Diet Setup List
10. Enter Nursing Details
11. View Nursing Care Details
12. Enter Clinical Chart
13. View Clinical Chart Details
14. Enter Intake Output
15. View Day Wise Intake Output Details
16. View Summary Intake Output Details
17. Transfer Patient from One Bed to Other Bed in the same Ward or One Ward to Other Ward.
18. Enter Expendable Non Drug-Consumption details
19. Generate Department Indent to Dispensary

- 20. View Indent Details
- 21. CRV Against Indent
- 22. View CRV Details
- 23. View Current Stock.
- 24. Enter Patient Medicine issue Details
- 25. View Patient Wise Medicine Details
- 26. Enter Patient Discharge Slip
- 27. View Discharge Slip and Discharge Summary Details.
- 28. View summary of drugs issued for any given period along with patient details
- 29. View Bed Status color coded (Vacant/Occupied/Ready to Discharge)

Nursing Station

The Below screen shows ward wise list of the admitted patients. It is the main screen. All the activities are done from this screen. E.g. Case Sheet, Kit Issue, Nursing Care Setup, Nursing Entry, Clinical Entry, Intake Output, Medicine Issue, Diet Setup, Bed Transfer, SIL/DIL, MLC, Discharge Slip, Upload Document.

How to use this screen (Fig 2):-

1. User has to click on Accept button whenever patient physically comes to ward. This changes his status from “Occupied but not reported to ward” To “Occupied and reported to ward”.
2. On moving the mouse to any occupied bed, the system displays patient information like A&D No., Patient Name, ADM Date, Diagnosis, Treatment, Procedure, Physiotherapy, Nursing Care, etc.

Note: - For each & every ward the total number of beds images is generated automatically by the system with the respective color code.

Back: Click takes back to the Nursing Station page.

Reset: Click erases all the data and reload the page for new entry.

Case Sheet

- This screen used to enter Case Sheet Details for Inpatient (Admitted Patient).
- Select the patient (whose status is occupied and reported to ward) for whom the details are to be entered from the nursing station screen (Fig 2) and then click the Case Sheet button. It displays the patient details like A&D No, Service No, Ward, Patient Name, Relation, Rank, Name, Trade/Branch, Unit, Age, Gender, Diagnosis, Admitting MO, Allergies, Med Cat, Disability, Date, and Time.
- It also displays date & time wise IPD case sheet of the selected patient in read only format.
- It displays only last OPD case sheet of the selected patient in read only format.
- Here user can also add details like Case Notes, Diagnosis, Treatment, Investigation, Procedure and Physiotherapy and Diet details. After Saving all the details when this page be re- loaded the system shows previously entered data at this Stage at TWO places on same case sheet Screen:-
 - 1) Date & time wise IPD case sheet of the selected patient in read only format (Fig 5).
 - 2) System allows the user to repeat the same Details for same patient but with new investigation details/Data.
